Writing Better Prompts — Task 1

Example 1: Climate Change

Vague Prompt: "Explain climate change."

Output: Climate change refers to long-term shifts in Earth's temperature and weather patterns, mainly caused by human activities like burning fossil fuels and deforestation, which release greenhouse gases into the atmosphere.

Improved Prompt: "Explain climate change in 3 bullet points for a 12-year-old student."

Output:

- Climate change means the Earth is getting warmer due to pollution from cars, factories, and burning fuels.
- It causes problems like floods, droughts, melting ice caps, and extreme weather.
- We can help by planting trees, using less electricity, and choosing cleaner energy sources.

Comparison & Analysis: The vague prompt produced a general, textbook-style explanation. The improved prompt gave a shorter, simpler, age-appropriate response because it specified the format (3 bullet points), the audience (12-year-old), and the simplicity level. This shows how prompt clarity directly shapes the usefulness of AI output.

Example 2: Resume Writing

Vague Prompt: "Write a resume."

Output: Name: John Doe | Education: B.Sc. Computer Science | Skills: Communication, Programming | Experience: Fresher

Improved Prompt: "Write a one-page resume for a fresh computer science graduate applying for a software internship, including skills, education, and projects sections."

Output:

John Doe Email: johndoe@email.com | Phone: +91 XXXXX XXXXX

Career Objective Motivated Computer Science graduate seeking a software development internship to apply programming and problem-solving skills in a professional environment.

Education Bachelor of Science in Computer Science — XYZ University | 2026

Skills

- Python
- Java
- HTML & CSS
- MySQL
- Problem Solving

Projects Student Management System — Developed a basic student record management system using Python and MySQL.

Certifications

- Introduction to Cybersecurity
- Web Development Basics

Comparison & Analysis: The vague prompt generated a very basic and incomplete resume with minimal details. The improved prompt clearly specified the candidate type (fresh CS graduate), the job role (software internship), the format length (one-page), and the required sections (skills, education, projects). Because of these details, the AI generated a more professional, structured, and job-oriented resume.

Example 3: Marketing Ideas

Vague Prompt: "Give me a marketing idea."

Output: You can promote your business on social media and offer discounts to attract more customers.

Improved Prompt: "Give me 3 Instagram marketing ideas for a small bakery in Mumbai targeting college students, with captions and hashtags."

Output:

1. Reels Challenge Create a fun reel showing "Study Break + Dessert Combo" offers for students. Caption: "Late-night study sessions need sweet support 🍩📚 Visit us with your friends and grab student combo offers!" Hashtags: #MumbaiBakery #StudentLife #DessertLover #CollegeVibes #BakeryReels

2. Meme Marketing Post relatable college memes connected with cravings and exams. Caption: "Assignment stress disappears after one chocolate pastry 😭🍰" Hashtags: #ExamMood #MumbaiFoodies #BakeryLove #CollegeMemes #FoodGram

3. Giveaway Contest Run a giveaway where students tag friends to win free cupcakes. Caption: "Tag your college gang and win FREE cupcakes this weekend 🧁✨" Hashtags: #GiveawayIndia #MumbaiCafe #CupcakeLove #CollegeStudents #FoodContest

Comparison & Analysis: The vague prompt generated a generic and broad suggestion with no target audience or platform. The improved prompt specified the platform (Instagram), business type (small bakery), target audience (college students), location (Mumbai), and required elements (captions and hashtags). This helped the AI generate creative, audience-focused, and ready-to-use marketing ideas.
